## **BACKGROUND DISCUSSION:**

At the September 24, 2014 City Council meeting, staff was asked to find an appropriate source of funding for irrigation flow corrections at approximately 3100 West and 7000 South. This project would normally be funded from storm drain funds because irrigation water is sometimes combined with City storm drain runoff. In this case, however, funding can come from Road Capital monies through the telecommunication tax source, because the reduction in flow may be related to a 1993 roadway project (safe sidewalk). Thus, problems that may be related to the original road project could be paid for by the same source of funds. Staff therefore recommends using the telecommunication tax monies for this project.

It is not recommended at this time that storm drain funding priorities be changed to “move the project up the list” from a storm water perspective. This would set a precedent that should not be allowed since criteria for selecting individual project priority have been set by previous budget discussions.
